

Expand clinical services, increase customer satisfaction and drive script growth

YOUR PHARMACY SOLUTION

Immunization Solution

Last year, pharmacies administered 35% of flu vaccines in the US and patients visited a pharmacist eight times more than any other medical provider. With the continuing effects of the COVID-19 pandemic and expectations of a busier-than-usual flu season, manufacturers are boosting vaccine production to record levels. Is your pharmacy prepared to efficiently and effectively manage the increased demand for immunization services and all of the associated workflow challenges?

Optimize your immunization services with the EnlivenHealth™ Immunization Solution

The EnlivenHealth™ Immunization Solution transforms pharmacy vaccination workflows. Our Immunization Solution enables pharmacies to streamline workflows by supporting the scheduling, administration, documentation and reporting of vaccinations. This solution gives you the proven, powerful tools you need to ensure that patients receive timely vaccinations.

Leveraging data to identify opportunities to drive pharmacy revenue

By identifying and prioritizing eligible patients, the EnlivenHealth™ Immunization Solution enables pharmacies to run targeted vaccine administration campaigns, creating new revenue opportunities. With connectivity to individual state registries, pharmacies can obtain current, individualized vaccination histories in order to make informed decisions regarding the delivery of patient care, with an important focus on high-risk patients.

Proven benefits of the EnlivenHealth™ Immunization Solution

- **Clinical Decision Support** – Identifies, pinpoints and prioritizes patients that need vaccinations
- **Improve Patient Retention** – Provides patients with a convenient location to receive vaccinations, increasing their satisfaction and, ultimately, retention
- **Simplify Workflow** – Streamlines workflow by automatically updating the appropriate state immunization registry
- **Better Patient Communications** – Offers an enhanced capability to deliver effective communications to patients about receiving their vaccines at your pharmacy
