

Are you ready for the upcoming vaccination and testing season?

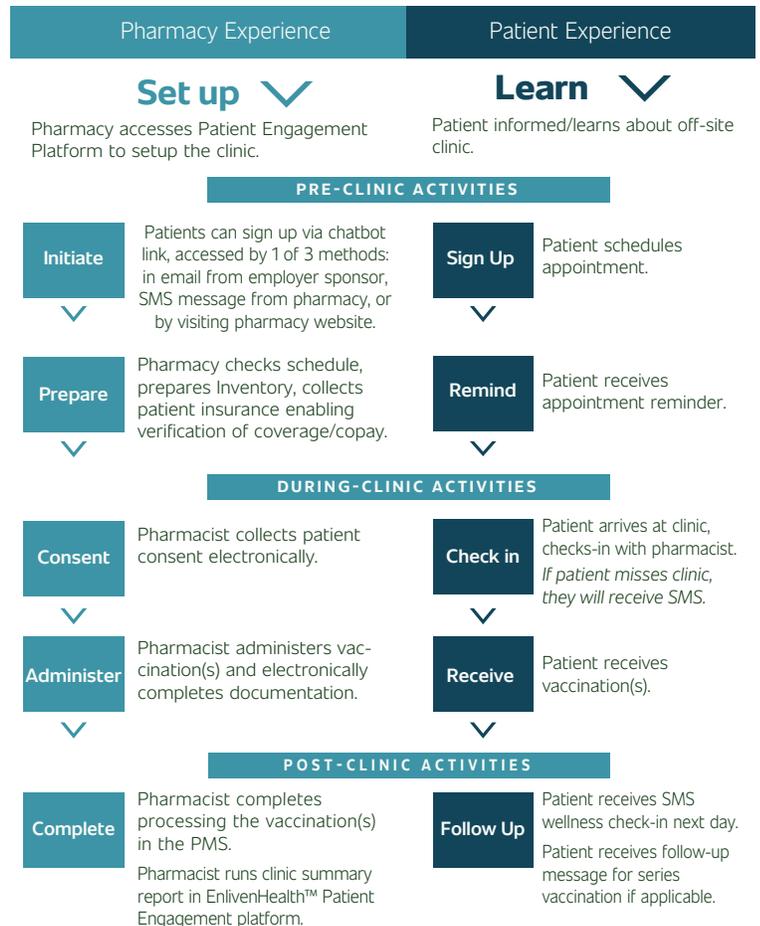

YOUR PHARMACY SOLUTION

CareScheduler

Last year, pharmacies administered approximately 32% of the flu vaccinations in the US. With the continuing effects of the COVID-19 pandemic, there's an expectation for historically high patient demand for flu and pneumonia vaccinations, as well as seasonal point-of-care testing, is expected. Pharmacies will be challenged as never before to cost-effectively manage a major influx of patient traffic and requests.

The Solution: CareScheduler – the first fully-automated scheduling solution for pharmacies and their patients

CareScheduler from EnlivenHealth™ is a breakthrough solution that automates the existing manual and inefficient processes of scheduling, managing, and reporting vaccinations and point-of-care testing. CareScheduler from EnlivenHealth™ uses advanced digital technology – including mobile messaging and convenient chatbots – to streamline and simplify the entire process of notifying patients about available therapies and tests, and then managing every step in the process of administering them.

Key benefits of CareScheduler Solution from EnlivenHealth™

- **Automated Workflow** – Appointment-based vaccinations allow pharmacists to prepare for patients without disrupting routine tasks
- **Efficient Scheduling** – Reduces the number of pharmacy walk-ins, enabling the pharmacy to staff accordingly
- **Rapid Adoption** – User-friendly, fully-automated solution ensures minimal staff time required for training and implementation
- **Better Patient Communications** – Strengthens patient engagement by providing appointment reminders and day-after wellness check-ins
