

Are you using mobile health technology to improve your patients' pharmacy experience?

YOUR PHARMACY SOLUTION

## Mobile App

Last year, US consumers spent, on average, three and a half hours a day using mobile internet, with 88% of that time spent on apps. With the continuing effects of the COVID-19 pandemic, patients are becoming more comfortable with and relying upon mobile applications as their primary means for interacting with pharmacies. If your pharmacy is not connecting with patients through this essential mobile channel, you are at a disadvantage.

### Enhance your patient pharmacy experience with Mobile Application from EnlivenHealth™

The Mobile App from EnlivenHealth™ is a patient-facing app that orchestrates engagement between the patient and the pharmacy. This proven app provides pharmacies with their own branded mobile app to help patients manage medication use. It improves patient adherence by finding a pharmacy location, managing and refilling medications, setting prescription reminders, and tracking health measures.

The EnlivenHealth™ Mobile App enables pharmacies to use realtime data and patient communication preferences to transform routine interactions into powerful engagement opportunities that lead to healthier and happier patients.

### Create collaboration that leads to happy and healthy patients

EnlivenHealth™ Mobile App is an innovative collaboration tool specially designed to improve patient engagement and medication adherence. By giving patients the opportunity to create a central repository of health information within the application, pharmacies will have the insights necessary to deliver the right intervention during engagements leading to better patient care and better outcomes.

Our EnlivenHealth™ Mobile App features advanced technology that delivers increased patient satisfaction and retention and improved medication adherence leading to better health outcomes.

## Key benefits of Mobile App from EnlivenHealth™

- **Better Patient Communications** – Strengthens engagement by communicating with each patient directly using push notifications
- **Rapid adoption** – User-friendly solution that requires minimal staff time for training and implementation
- **Increased script volume** – Provides a frictionless method for refilling prescriptions and setting medication dose reminders
- **Build customer loyalty** – Deliver effective campaigns that increase engagement, patient satisfaction and drive revenue
