

Are you ready for the upcoming COVID-19 vaccine?

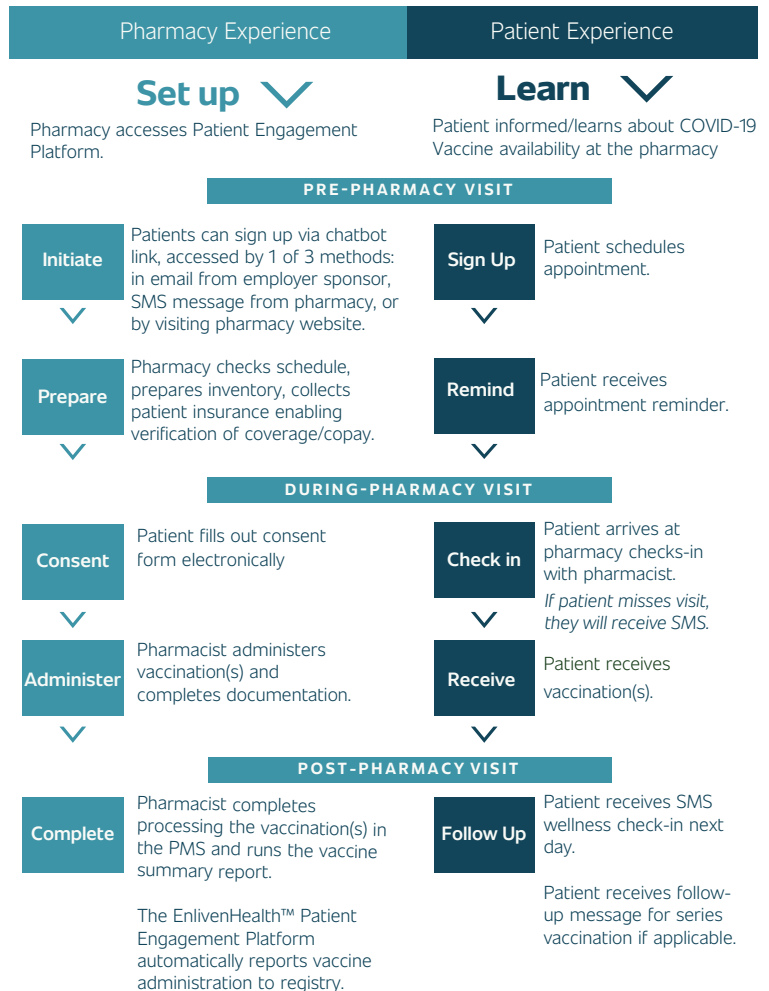

YOUR PHARMACY SOLUTION

CareScheduler

In 2019, pharmacies administered approximately 32% of the flu vaccinations in the US and that percentage is expected to increase this year. With the news that the US Department of Health and Human Services has authorized pharmacists to order and administer approved COVID-19 vaccines, retail pharmacists will play a central role in COVID vaccinations. Pharmacies will be challenged as never before to cost-effectively manage the major influx of patient traffic and requests.

The Solution: CareScheduler – the first hands-free scheduling and vaccine registry reporting solution for pharmacies and their patients

CareScheduler is the breakthrough solution from EnlivenHealth™ that enables pharmacies to provide hands-free scheduling, consent and registry reporting for the eventual COVID-19 vaccine, significantly reducing infection risk for pharmacy patients and staff. CareScheduler from EnlivenHealth™ uses advanced digital technology – including mobile messaging and convenient chatbots – to streamline and simplify the entire process of notifying patients about available therapies and then managing every step in the process of administering them.

Proven benefits of the EnlivenHealth™ CareScheduler Solution

- **Operational Efficiency** - Appointment-based vaccinations allow pharmacists visibility into schedule and inventory needs
- **Hands-Free Scheduling and Consent** - Reduces the number of pharmacy walk-ins, enabling the pharmacy to staff accordingly
- **Reduced Infection Risk** - Patients fill out forms in advance electronically, reducing contact with physical paper and pens as well as reducing the overall time spent in the pharmacy
- **Rapid Adoption** - User-friendly, fully-automated solution ensures minimal staff time required for training and implementation
- **Better Patient Communications** - Strengthens patient engagement by providing appointment reminders and day-after wellness check-ins
- **Vaccine Reporting** - Automates the pharmacy's process of reporting to the vaccine registries
