

Are you prepared for the confluence of flu season and COVID-19 boosters?

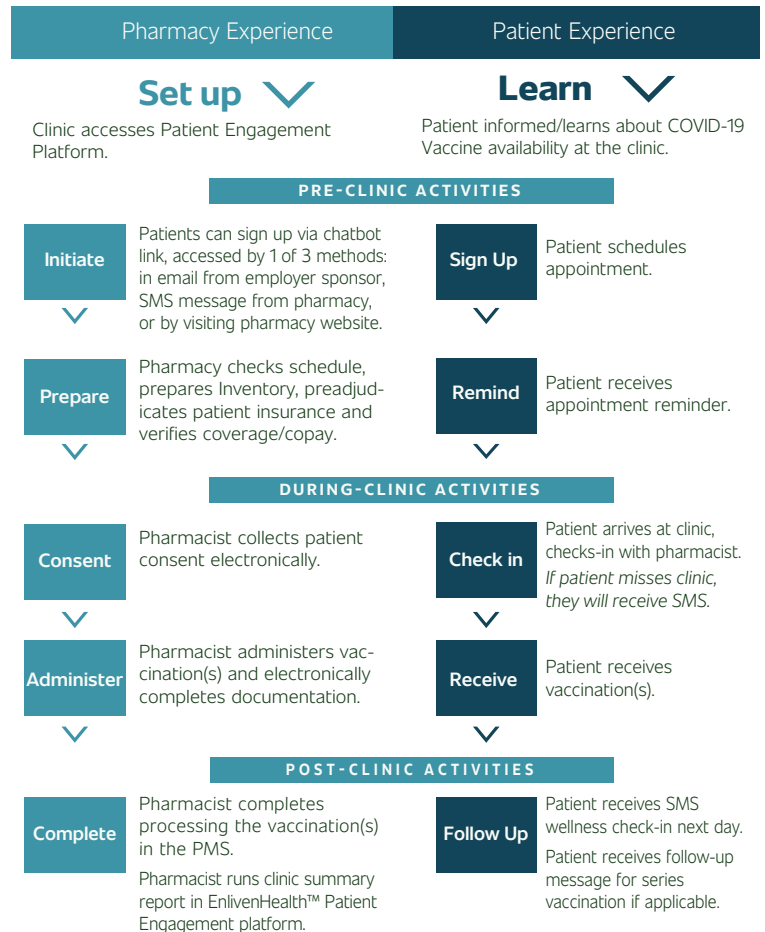

YOUR PHARMACY SOLUTION

## CareScheduler

Pharmacists are among the most trusted healthcare professionals, and with the current flu season coinciding with the rollout of the COVID-19 booster, their role is more important than ever. Pharmacies once again find themselves on the frontlines of providing the healthcare that is essential to keeping patients health and happy. They will be challenged as never before to cost-effectively manage a major influx of patient traffic and requests.

### The Solution: CareScheduler – the first fully-automated scheduling solution for pharmacies and their patients

CareScheduler from EnlivenHealth™ is a breakthrough solution that automates the existing manual and inefficient processes of scheduling, managing, and reporting vaccinations and point-of-care testing. CareScheduler now features powerful new capabilities that use artificial intelligence (AI) to automatically recommend and recruit pharmacy patients who are in most need of receiving the flu vaccine, and allows patients to jointly book appointments for the flu and COVID-19 vaccines and boosters, using just a single electronic form for documentation.

## Key Benefits of CareScheduler solution from EnlivenHealth™

- **Flu Vaccine Recruitment** – Recommends patients to target for the pharmacy's flu campaign, leading to higher conversion ratios
- **Joint Scheduling & Combined Documentation** – Allows patients to simultaneously book a single appointment for flu and COVID-19 vaccines, and records necessary documentation and custom consent language with a single electronic form for both vaccines
- **Automated Workflow** – Appointment-based vaccinations allow pharmacy staff to prepare for patients without disrupting routine tasks
- **Rapid Adoption** – User-friendly, fully-automated solution ensures minimal staff time required for training and implementation
