

Are you using mobile health technology to improve your patients' pharmacy experience?

EnlivenHealth® Mobile App

Last year, US consumers spent an average of three and a half hours a day using mobile devices, with 88% of that time spent on apps. With the continuing effects of the COVID-19 pandemic, patients are increasingly relying upon mobile applications as their primary means for interacting with pharmacies. Pharmacies have an opportunity to connect with patients through this essential mobile channel to improve the patient experience and grow their pharmacy business.

Enhance your patient pharmacy experience with Mobile App from EnlivenHealth®

The Mobile App from EnlivenHealth® is a patient-facing app that orchestrates engagement between the patient and the pharmacy. This proven app provides pharmacies with their own branded mobile app so they can deliver timely, personalized messaging and create convenient interactions that transform patient engagement, improve health outcomes, and increase patient retention.

With our Mobile App, pharmacies can improve medication adherence by empowering patients to refill and manage their prescriptions in real-time, receive notifications about their medications and pharmacy offers, find store information/locations, and access drug and health-related information. Plus, EnlivenHealth's Mobile App allows pharmacies to offer patients additional value-added capabilities such as location-based customer surveys, health and wellness appointment scheduling, push notifications, shopping lists, and daily dose reminders.

Create collaboration that leads to happy and healthy patients

EnlivenHealth's Mobile App features advanced technology that delivers increased patient satisfaction and retention and improved medication adherence, leading to better health outcomes.

Key features of our Mobile App include:

- 3 ADA WCAG 2.0 compliant design templates
- Customized colors and logo
- Anonymous refills (no login required)
- Secure patient profile
- Biometric login
- Store locator with filters
- Internal and external prescription transfers
- Grocery/store-front app integration
- Medication/pill image
- Premium and clinical push notifications
- Health and wellness scheduler integration
- Med Sync enrollment integration

Key benefits of Mobile App from EnlivenHealth® include:

- **Increased Patient Retention**
EnlivenHealth's Mobile App provides a better pharmacy experience that improves patient satisfaction ratings and user-retention. In fact, pharmacies using our app typically enjoy a 55% patient base that regularly use the app.
- **Improved Operational Efficiency**
Automated refills can free up pharmacists to focus on patient care and revenue-generating value-added services.
- **Stronger Revenue Growth and Profitability**
Our Mobile App automates refills and answers basic questions so your pharmacy staff can practice at the top of their license and focus on patient care.
